SUBJECT: Letter of Support for Martine Ceberio

Dear Richard Schoephoerster,

Dr. Martine Ceberio was selected to be part of the Executive Committee for the Program in Computational Science (CPS) from 2008-2013 as the Computer Science Representative. It has been my pleasure to have such an enthusiastic and organized person in the committee, always willing to participate in extra activities and meetings. The committee meets 2-3 times a years to discuss key issues in the directorship of the program and implementation of the rules that affects CPS graduate and faculty. In particular, Dr. Ceberio has been essential with her ideas in the implementation of the rules in regards of the student's performance, degree plans, class additions/substitutions. I deeply appreciate her service on this committee, and I am sure that she will continue to be a valuable member in the program and your college as she becomes a tenured faculty. I strongly support her application for her tenure and promotion.
